Easements from landowners											
Invitation to Bid (for paving)											
Bid Award											
Construction											
Construction											

Additional Comments/Questions:

- The Connector Trail will connect the trail from behind the City Pool on North Street to the Head of Falls area. The only segment that needs actual construction is from the pool to Edgemont Street. Other segments will follow City streets and will require only paint and signage.
- Funding (80%) for the the Connector Trail comes from an MDOT "Transportation Enhancement" grant award to the City. The City is required to match 20% through in-kind services/equip. and contributions (KMTrails).
